# Viper Rack™ series

## The Viper Rack™ Advantages

- High strength steel tubing supports bicycle by its frame, eliminating wheel damage
- Smooth Powder coated finish to protect bicycle
- Allows locking of both wheel and frame for highest security
- Extra wide arch allows easy access even at maximum capacity

Viper Racks are a space efficient, economical and secure method of parking bicycles.

An increasing number of communities have realized the importance of bicycling as an alternative mode of transportation. Our high quality products and customer care will make you a leader in your community.

# Specifications

## Availability

Delivery time is approximately 2 weeks after receipt of order. Racks are shipped FOB Santa Paula, California, USA, 93060

## Materials

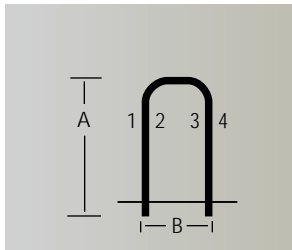

All MIG welded construction. Tubing is 2" OD with .09 thickness. Finished racks are grit blasted, then polyester powder coated and oven cured. Polyester powder coating will not chip, has excellent corrosion resistance. Smooth finish will not scratch bicycle. Standard color is black. Base Plates shall be 6" square with gussets for high strength.

## Installation

Viper Rack Model 1042 and 2082 with base plates use 8 expansion anchors which are available (PN#MK9000). Installation in hard masonry is recommended. Racks can be installed on asphalt, but concrete embedment for anchors is recommended. Installation instructions provided with each shipment.

Viper Rack Model 1041 and 2081 are in ground mount and have 8" longer end posts for installation in concrete. Soft surfaces can be accommodated with post hole digger and ready mix concrete. Installation instructions provided with each shipment.

## 1041 4 bike

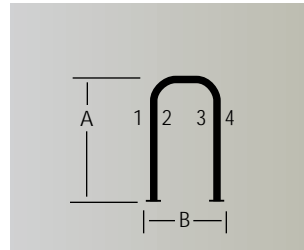

**Model 1041  
without Base Plate**

A \_\_\_\_\_ 47" 119.38 cm

B \_\_\_\_\_ 22" 55.88 cm

Weight \_\_\_\_\_ 16 lbs 7.26 kg

## 1042 4 bike

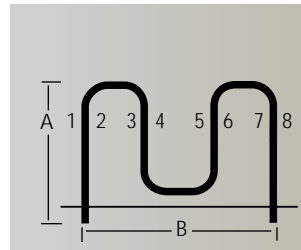

**Model 1042  
with Base Plate**

A \_\_\_\_\_ 39" 99.06 cm
