

# LEEDS Form

## Physical Address:

American Bicycle Security Company  
401 South Beckwith Road  
Santa Paula, CA 93060

## MR Credit 5: Regional Materials

If the project site is located within a radius of 500 miles from our location (above), you can receive 1 to 2 points, based on the percentage of regional materials. **(1-2 Points)**

## SS Credit 4.2: Alternative Transportation – Bicycle Storage

### Requirements:

1. Commercial or Institutional Projects  
-Provide secure bicycle lockers or racks within 200 yards of a building for 5% or more of all building users (measured in peak periods). **(1 point)**
2. Residential Projects  
-Provide covered storage facilities for securing bicycles for 15% or more of building occupants. **(1 point)**

## MR Credit 4: Recycle Content

*\*Please note that this refers to American Bicycle Security Company's ECO series ONLY. Standard lockers do not have any recycled content. Refers to recycled racks as well.*

### Requirements:

-Use recycled content such that the sum of postconsumer recycled content plus ½ of the preconsumer content constitutes at least 10% or 20%, based on cost, of the total value of the materials in the project. The minimum percentage materials recycled for each point threshold is as follows:

10% Recycled content = 1 point

**20% Recycled content = 2 points**

The recycled content value of a material assembly is determined by weight. The recycled fraction of the assembly is then multiplied by the cost of assembly to determine the recycled content value.

# Made In the U.S.A.

\*ECO Series bike lockers contain 25% recycled material

\*Recycle Racks contain 96% recycled material
